# **Smart Home Security Checklist**

# **Change Default Passwords**

- [] Update password on each device (e.g., Alexa, Ring, Nest)
- [] Use a strong, unique password for each device
- [] Store passwords securely in a password manager

# **Separate Smart Devices from Personal Devices**

- [] Log into router (192.168.1.1 or similar)
- [] Create a guest Wi-Fi network for IoT devices
- [] Move phones/laptops to the main network

### **Keep Your Devices Updated**

- [] Check each device for firmware or software updates
- [] Enable automatic updates if available

### **Disable Unnecessary Features**

- [] Turn off voice recording (Alexa, Siri, Google Assistant)
- [] Disable remote access unless actively used
- [] Limit permissions (e.g., location access)

#### Secure Your Wi-Fi Router

- [] Change default admin login credentials
- [] Use WPA2 or WPA3 encryption
- [] Disable UPnP and close unused ports
- [] Keep firmware up to date
- [] Use a firewall to block suspicious traffic
